Basic Helicopter Aerodynamics

John M. Seddon, Simon Newman

Basic Helicopter Aerodynamics John M. Seddon, Simon Newman

Basic Helicopter Aerodynamics is widely appreciated as an easily accessible, rounded introduction to the first principles of the aerodynamics of helicopter flight. Simon Newman has brought this third edition completely up to date with a full new set of illustrations and imagery. An accompanying website www.wiley.com/go/seddon contains all the calculation files used in the book, problems, solutions, PPT slides and supporting MATLAB® code.

Simon Newman addresses the unique considerations applicable to rotor UAVs and MAVs, and coverage of blade dynamics is expanded to include both flapping, lagging and ground resonance. New material is included on blade tip design, flow characteristics surrounding the rotor in forward flight, tail rotors, brown-out, blade sailing and shipborne operations.

Concentrating on the well-known Sikorsky configuration of single main rotor with tail rotor, early chapters deal with the aerodynamics of the rotor in hover, vertical flight, forward flight and climb. Analysis of these motions is developed to the stage of obtaining the principal results for thrust, power and associated quantities. Later chapters turn to the characteristics of the overall helicopter, its performance, stability and control, and the important field of aerodynamic research is discussed, with some reference also to aerodynamic design practice.

This introductory level treatment to the aerodynamics of helicopter flight will appeal to aircraft design engineers and undergraduate and graduate students in aircraft design, as well as practising engineers looking for an introduction to or refresher course on the subject.

From reader reviews:

Eric Fincher:

This Basic Helicopter Aerodynamics are usually reliable for you who want to be a successful person, why. The reason why of this Basic Helicopter Aerodynamics can be on the list of great books you must have will be giving you more than just simple examining food but feed anyone with information that probably will shock your preceding knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this Basic Helicopter Aerodynamics forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

Guadalupe Eggleston:

Hey guys, do you would like to finds a new book to read? May be the book with the name Basic Helicopter Aerodynamics suitable to you? The particular book was written by renowned writer in this era. The book untitled Basic Helicopter Aerodynamics is a single of several books this everyone read now. This specific book was inspired many men and women in the world. When you read this e-book you will enter the new shape that you ever know before. The author explained their idea in the simple way, so all of people can easily to know the core of this guide. This book will give you a great deal of information about this world now. In order to see the represented of the world with this book.

Lucille Davis:

Does one one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you never know the inside because don't judge book by its protect may doesn't work is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer is usually Basic Helicopter Aerodynamics why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

Randal Revilla:

Reading a book to be new life style in this year; every people loves to study a book. When you learn a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, in addition to soon. The Basic Helicopter Aerodynamics provide you with new experience in reading a book.
