**Adventures in Coding (Adventures In ...)** Eva Holland, Chris Minnick  
**Learn to code the *fun* way with nine real projects for true beginners**

*Adventures in Coding* is written specifically for young people who want to learn how to code, but don't know where to begin. No experience? No problem! This book starts from the very beginning to take you from newbie to app-builder in no time. You'll 'learn by doing' as you build projects designed to help you master fundamental programming skills—and you'll have a great time doing it. These skills form the foundation of any programmer's tool set, and you'll continue to use them as you graduate to other devices and more difficult projects. Each chapter includes a video to help clear up any confusion and make sure you *really* understand, so you can keep programming your way through every single project without hitting major roadblocks. If you're ready to start designing your own program, this book will help you get started today.

More and more kids are learning to code, and many schools offer basic programming classes as part of the regular curriculum. This book is structured like a class, starting with the basics and building skill upon skill, making it both a perfect accompaniment to formal instruction and an ideal guide for self-study.

- Learn the basic programming skills you'll use everywhere
- Build nine fun projects from super-basic to pretty challenging
- Build the skills you need to create bigger and better apps
- Watch video tutorials for extra help and explanations

How many times have you played with an app only to find yourself wishing it had this or that feature? If you learn how to code, *you* can be the creator of the next big app! But it all starts with that first small project. *Adventures in Coding* provides all the information you need, so let's get coding!
