Studies on the Singapore Economy

Keen Meng Choy

Studies on the Singapore Economy Keen Meng Choy

Though there are several books on the Singapore economy, none have focused on the time series-based investigations. This book tries to address that gap and attempts to add to what we know from studies in the descriptive tradition. It is a compendium of twenty of the author's academic studies on the Singapore economy which have appeared previously as journal papers, book chapters, and feature articles. The papers share a common methodology of social scientific enquiry viz., time series econometrics, and are divided into three parts: macroeconomy, business cycles and forecasting. Each part brings together empirical essays that deal with particular aspects of these related fields. The book will be of interest to economists, policy-makers and students seeking a quantitatively informed understanding of the Singapore economy.

Readership: Economists, policy-makers, public and private sector practitioners involved in monitoring and predicting economic developments, students and researchers interested in the Singapore economy.
