Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables U.S. Department of Commerce National Bureau of Standards

Preface

The present volume is an outgrowth of a Conference on Mathematical Tables held at Cambridge, Mass., on September 15-16, 1954, under the auspices of the National Science Foundation and the Massachusetts Institute of Technology. The purpose of the meeting was to evaluate the need for mathematical tables in the light of the availability of large scale computing machines. It was the consensus of opinion that in spite of the increasing use of the new machines the basic need for tables would continue to exist.

Numerical tables of mathematical functions are in continual demand by scientists and engineers. A greater variety of functions and higher acciu-acy of tabulation are now required as a result of scientific advances and, especially, of the increasing use of automatic computers. In the latter connection, the tables serve mainly for preliminary sm-veys of problems before programming for machine operation.

For those without easy access to machines, such tables are, of course, indispensable. Consequently, the Conference recognized that there was a pressing need for a modernized version of the classical tables of functions of Jahnke-Emde. To implement the project, the National Science Foundation requested the National Bureau of Standards to prepare such a volume and established an Ad Hoc Advisory Committee, with Professor Philip M. Morse of the Massachusetts Institute of Technology as chairman, to advise the staff of the National Bureau of Standards during the course of its preparation. In addition to the Chairman, the Committee consisted of A. Erdelyi, M. C. Gray, N. Metropolis, J. B. Rosser, H. C. Thacher, Jr., John Todd, C. B. Tompkins, and J. W. Tukey.

The primary aim has been to include a maximum of useful information within the limits of a moderately large volume, with particular attention to the needs of scientists in all fields. An attempt has been made to cover the entire field of special functions. To carry out the goal set forth by the Ad Hoc Committee, it has been necessary to supplement the tables by including the mathematical properties that are important in computation work, as well as by providing numerical methods which demonstrate the use and extension of the tables.

The Handbook was prepared under the direction of the late Milton Abramowitz, and Irene A. Stegun. Its success has depended greatly upon the cooperation of many mathematicians. Their efforts together with the cooperation of the Ad Hoc Committee are greatly appreciated. The particular contributions of these and other individuals are acknowledged at appropriate places in the text. The sponsorship of the National Science Foundation for the preparation of the material is gratefully recognized.

It is hoped that this volume will not only meet the needs of all table users but will in many cases acquaint its users with new functions.
Allen V. Astin, Director.
Washington, D.C.

From reader reviews:

Carmela Williams:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite guide and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables. Try to face the book Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables as your good friend. It means that it can being your friend when you feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortuned to suit your needs. The book makes you considerably more confidence because you can know every thing by the book. So , let's make new experience and also knowledge with this book.

Becky Duncan:

This Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this reserve incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. That Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables without we know teach the one who examining it become critical in thinking and analyzing. Don't end up being worry Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables can bring whenever you are and not make your bag space or bookshelves' grow to be full because you can have it within your lovely laptop even phone. This Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables having good arrangement in word as well as layout, so you will not really feel uninterested in reading.

Janet Thaxton:

Nowadays reading books be than want or need but also become a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge your information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want get more knowledge just go with training books but if you want sense happy read one using theme for entertaining for example comic or novel. The actual Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables is kind of publication which is giving the reader unstable experience.

Tara Payton:

This book untitled Handbook of Mathematical Functions: with Formulas, Graphs, and Mathematical Tables to be one of several books in which best seller in this year, here is because when you read this publication you can get a lot of benefit on it. You will easily to buy this book in the book retail outlet or you can order it by way of online. The publisher of this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Cell phone. So there is no reason to you personally to past this

book from your list.
