Using clear and concise language this book introduces new users to the use of the TeX system, in particular
document preparation using LaTeX. It avoids the pitfalls of having to search through several advanced books
on the subject, by collecting together the more frequently required tools and presenting these in a single
accessible volume. It also describes the recent developments in multilingual typesetting using TeX that now
make it straightforward for users to prepare documents in their own language and alphabet, giving the book a
global readership. Topics include: multi-lingual uses of LaTeX; discussion of hardware implementations; use
and misuse of particular LaTeX commands; and many others.
